MOBILE APP BUILDER

LUXEGOLD

Create the Ultimate Gold Jewelry Shopping Experience.

LuxeGold Key Features

User-Friendly Experience

Our app offers easy navigation with filters to sort products by category, price, style, or material. Detailed descriptions, high-quality images, and customer reviews help you make the perfect choice.

Elegant Product Showcase

High-definition product images, customizable descriptions, and easy-to-navigate categories. Let your customers explore exclusive designs, latest trends, and classic pieces anytime, anywhere.

Exclusive Offers & Discounts

Boost customer engagement with in-app promotions. Offer discounts, limited-time offers, and exclusive sales. Instantly notify customers about new collections and special deals via push notifications.

Secure & Convenient Shopping

Enjoy secure payment options like credit cards, PayPal, and Apple/Google Pay and let customers save their details for faster, one-click purchases in the future.

Secure Account Profiles

Customers can create profiles to store preferences, order history, and shipping details, allowing for a personalized experience each time they return.

Social Sharing & Wishlist Features

Enable customers to share their favorite pieces on social media, expanding your reach. They can also create and share wishlists for special occasions and gifts.

LuxeGold Admin Panel Features

APP Management Dashboard

Manage listings, view inventory, and organize collections from a user-friendly dashboard. Easily edit product details, prices, and promotions with just a few clicks.

Smart Product Management with AI

Easily upload products by snapping photos with your mobile camera. The app uses AI to remove backgrounds, replace them with selections from a background library, and resize images for a perfect fit—making each piece ready for display.

Tag Scanner with AI-Powered OCR

Streamline data entry with AI-powered OCR. Simply capture jewelry tags, and the app extracts details like carat, weight, and design, storing them directly in the database for fast, accurate records.
